

IP Camera Viewer Works with BlackBerry® Smartphones

malIDIOS of Sunnyvale, Calif., releases an update of MobileIPCamViewer version 2.0 with support for BlackBerry® series smartphones from Research In Motion (RIM). Users can enjoy the freedom of watching and controlling pan, tilt, zoom security and surveillance video cameras using their BlackBerry smartphone at any time.

The MobileIPCamViewer offers basic mobile video surveillance and remote video monitoring for business intelligence and advanced security and surveillance requirements to view, control cameras and obtain alerts on specific events. It's compatible with many top brand IP cameras.
