TCP, APN, WAP, Gateway and Port Carrier Settings

Often times software applications require your TCP connectivity to be set when using their program. Here are some settings for a few US carriers. To access the TCP settings, you must have OS3.8 or higher installed. From the home screen of your BB, go to Options - TCP.

[Access our new, most complete Carrier settings list here](#)**Old AT&T**

Re: TCP, APN, WAP, Gateway and Port Carrier Settings

Please let me know if anybody have correct settings for orange in switzerland. I have tried with APN:wap ad APN: orange, but it doesnt work.

Thanks in advance for your help

Re: TCP, APN, WAP, Gateway and Port Carrier Settings

hi!

I am from italy.

I have bought on ebay a 7230 from O2.

I can succesfully connect in GPRS thru TIM italian company, while it gives me "Data Connection Refused" using another italian company, WIND.

I cant understand why!

the APN is OK (internet.wind) even because it works on another palm(treo 270).

I really cant understand why GPRS connection doesnt work with WIND only using BB7230!!

Please shine your lights on me!!!!

Thanks, Byron

Midpssh. I talked to a CSR last night, but they recommended I talk to BB. (Ha!) I'm going to go back to the store in a few to see if I can get ahold of a technically-literate agent and get this fixed.

I'm a little uncertain about what I'm trying to do and I hate being technically-illiterate! 😞

Re: TCP, APN, WAP, Gateway and Port Carrier Settings

Stack level 3

I used those settings, but I can't get PicoNews to connect (I get a connection error) and MidpSSH won't get a tunnel to one of my linux boxen. Clearly there is another issue here, or I'm a total dweeb.

That's odd that the APN settings that I gave you don't work. Did you capitalize the username and password? You might have you Call Cingular and tell them to add wap.cingular to your account.

Re: TCP, APN, WAP, Gateway and Port Carrier Settings

Stack level 3

Yes, I duplicated the User ID and password exactly and have checked those entries several times. The local Cingular folks are clueless. That's not intended to be disparaging because they are not technical. Tier 1 technical support is not much better, but they're basically script readers anyway. Again, that's not intended to be disparaging -- it's just the nature of the business.

Apr 2006/346 posts
Trust Level:

I have a phone number for the Tier 2 support and am planning on calling them. I had too many other errands to get it done today. I suspect I need to ask them to add wap.cingular to my account.

Thank you!
