# Construction Manager

BlackBerry® Business Portfolio

“I need to keep theft and vandalism at my sites to a minimum.”

Solution: Remote Security Camera Access

“When a work site is closed for the night, I still have the confidence of knowing I can monitor it 24/7. On-site monitoring has been a huge benefit to my bottom line.”

“I need to keep material costs in check.”

Solution: Cost Containment

“Missing and lost materials kill my company’s margins. Wireless solutions mean I can react faster when I know something’s missing and replace what’s lost or mistakenly ordered with less time and paperwork.”

“I need to keep track of and pay my employees accurately.”

Solution: Timesheet and GPS Automation

“Hand-written timesheets are a pain for everyone. Now I have a better idea where my crews are at all times, and they keep track of their work more accurately, which is especially important when they travel with company vehicles.”

“I need more accuracy and flexibility in project scheduling.”

Solution: Scheduling

“Schedules slip, even with great subcontractors. But with my BlackBerry smartphone, I can precisely shift resources so I’m not caught in a domino effect that throws all my projects off.”

“I need mobile access to my customer information.”

Solution: Mobile Relationship Management

“I’m more effective when I have access to my customer information and communicate quickly both on and off the work site.”

## Bill McKinnis

Construction

41 years old

Seattle, Washington

“I can’t afford to waste anything. Time, workers and materials - I have to keep my costs down. Plus, in this economy, the next job could be weeks away, so there’s no slack or margin for error.”

# BlackBerry App World™

BlackBerry App World™ expands the BlackBerry user experience by offering a wide variety of quality-assured, fun and productivity-boosting applications built for BlackBerry smartphones.

## Timesheet and GPS Automation

**Actsoft**
