

Pelco-mobiDEOS Integrated Solution Prevents Theft at SF Bay Area Restaurant

Clovis, CA (November 30, 2010) – Pelco by Schneider Electric is pleased to announce that the open standards of the Pelco DX8100 DVR and mobiDEOS MobileCamViewer is providing the ideal integrated solution for the Boulevard Café, a San Francisco Bay Area restaurant, by thwarting an internal theft problem and protecting the wellbeing of its customers.

“It makes me feel more secure because I’m able to oversee my business without physically being there,” says restaurant owner Billy Panos.

OPEN STANDARDS CREATE NEW POSSIBILITIES

Pelco DX8100 & MobileCamViewer Prevent Internal Theft
The reliability, versatility and robust capabilities of the Pelco DX8100 DVR made it the recording solution of choice for Billy Panos, when he opened his restaurant in 2008. But, years later, Pelco's commitment to open standards and third-party integration has enabled him to further realize the possibilities of his DX8100 and entire video security system.

Since opening his San Francisco Bay Area restaurant, Boulevard Café, Panos has faced many of the same security challenges as other small business owners, including internal theft. To combat this problem and to protect the wellbeing of his business, Panos had a DX8100 DVR installed to support the 22 Pelco and third-party cameras located throughout the restaurant's interior and exterior.

"With the success of employees I have, it was imperative to have video security to deter theft of food, liquor and money," Panos said. "And Pelco and the DX8100 were highly recommended by my installer."

The Integrated Solution
Panos learned in 2009, and third-party integration enabled Panos to monitor and control his video security system in a way that was once inconceivable. Using the MobileCamViewer application from mobiDEOS, Inc. with his DX8100, Panos can monitor and view camera feeds from virtually anywhere using his iPhone. "It makes me feel more secure because I'm able to oversee my business without physically being there," Panos said.

"Surveillance systems and the mobile apps that work with them are worth their weight in gold," Panos said. "Once I started using them, he realized how I can utilize it. It is technology as he uses it."

From the camera footage relayed to his mobile phone via MobileCamViewer, Panos was able to see that drinks were being given away free from the bar, and put an end to the situation. "Bartenders are now no longer giving away drinks for free which has probably saved the company hundreds or even thousands of dollars," he said.

As Pelco continues its commitment to open standards, capabilities like Panos' will continue to multiply. With more than 250 companies certified in the Pelco Best Technology Development Program, Pelco is actively engaged in making some integrated solutions possible.
