<APR, Issue, 2008>

MobiDEOS, a provider of mobile access to video surveillance and remote video camera monitoring in Silicon Valley, the U.S.A., has signed up as an official Milestone Solution Partner, to provide an integrated offering on its MobileIPCamViewer product. With it, customers can easily enjoy the freedom of watching and controlling all the cameras connected to Milestone Xprotect's video management software via their cell phones -- anytime, anywhere with just the touch of a button. All this can be set up in less than 3 minutes!

The combination of the XProtect IP video software platform and MobileIPCamViewer brings tremendous convenience, flexibility, and improved Return On Investment for customers. Response to security or safety incidences can be faster than ever.

"MobileIPCamViewer is an exciting product for providing mobility to all surveillance devices connected through XProtect. First responders like police, firemen, ambulance drivers, and security guards can reap immediate benefits," said Henrik Friberg, Co-founder and VP Strategic Alliances at Milestone Systems.

"It is great to work with Milestone Systems XProtect, as it powers large, multiple installations and supports the widest choice in network hardware from over 40 security manufacturers including more than 400 camera models," said CEO of mobiDEOS, Inc. Sri Palasamudram.

The Milestone open platform enables partners like MobiDEOS to integrate XProtect IP video software with a broad and growing number of other systems and devices. Such interoperability provides customers with real added value for scalable future-proof solutions, allowing them to keep on top of the latest innovations in the marketplace.

MobileIPCamViewer is already integrated with major cell phone manufacturers such as Motorola, Nokia, BlackBerry (RIM), Sony-Ericsson, Sanyo, LG, Samsung, and HTC, with support for over 300 different models.

MobilePCamViewer has been in the market for over two years. It is currently distributed by, and operates on, leading cell phone carriers such as Cingular, Verizon (Blackberry), Sprint/Nextel, Alltel (Blackberry), Embarq, Boost Mobile, SouthernLinc, Qwest, Telus, Rogers, and Orange, as well as through resellers.
