MobileCamViewer
Enterprise Server**

Enterprise Server is a windows-based software designed for corporations, public-safety offices, police departments, etc. to allow its workforce, security staff and officers with internet access to instantly and securely access video from DVRs/NVRs and Cameras residing in an LAN, behind a firewall. Customers do not have to open ports, give VPN access or change firewall policies. Content is only pushed through SSL Encryption. Second layer of security and individual user-level administrative control.
