## MobiDEOS Inc. MobileCamViewer Enterprise Server

The MobileCamViewer Enterprise Server is a Windows-based software that allows users outside corporate LANs—such as security officers, guards, executives and police—to securely access video streams from DVRs, NVRs and cameras without opening ports, assigning VPN access or changing firewall policies. The video is only pushed through SSL Encryption, and the server doesn't allow any external requests inside the network. Administrators have full control and can add, disable or remove users in seconds. *MobiDEOS Inc.*

## MobiDEOS Inc. MobileCamViewer

The MobileCamViewer, a downloadable mobile software application that enables users to view surveillance camera footage through a cell phone, allows users to control a camera's pan, tilt, zoom and object-tracking functions. More than 95 percent of mobile devices are supported, and the software also works with DVRs, NVRs, video servers and IP cameras. The software is a robust platform to scale for thousands of users and is custom built to the mobile device. The client-server system is offered SAAS and through enterprise local installation. *MobiDEOS Inc.*
