mobiDEOS **announces** **partnership** **with** **Cellmania**

See page 25

mobiDEOS, specialized in providing mobile access to video surveillance and remote video camera monitoring, has announced that MobileCamViewer service will now be run on Cellmania's carrier-class infrastructure. Cellmania operates the content delivery infrastructure for major cell phone carriers such as AT&T, Telstra, Boost, Sprint/Nextel, and Orange.

The partnership allows users of MobileCamViewer to enjoy the security, reliability, and performance of Cellmania's carrier-class data center.

"It is our pleasure to bring an innovative application such as MobileCamViewer, which saves time and money and offers high ROI to customers, especially in this economy," said Cell-

mania CEO, Ronjon Nag, and added, "Cellmania is now pleased to offer hosting services for mobile application developers to speed up their time to market."

"It is great to work with Cellmania, a company that truly understands the needs of developers and offers the right kind of help, which in turn fosters value for the entire chain from consumers, to carriers, to developers and, of course, to Cellmania," said Sri Palasamudram, CEO of mobiDEOS, Inc.

The partnership allows users of MobileCamViewer to enjoy the security, reliability, and performance of Cellmania's carrier-class data center.
