IC Realtime provides digital video solutions ranging from a four camera retail store system which is our FlexView series that can seamlessly interface with most POS (point of sale) systems, to systems that accommodate large warehouse, department and commercial operations.

These larger facilities require increased storage, real time recording on all cameras, and networked video solutions that can be viewed on LAN, Wan, or internet which is available on our PRO Series.

Our digital video recorders are known for their reliability and ease of use. We have customized our DVRs to work with most popular PTZ (Pan Tilt Zoom) cameras allowing for easy integration with an exciting CCTV system. In a world where digital (DVR) is replacing analog (VCR) we here at IC Realtime see this as a major advantage.
